

# LIVING EARTH SYMPOSIUM

## Tribal ecoAmbassadors

Communities are the places where individuals join together in powerful ways to make change.

Across the United States, Environmental Protection Agency (EPA) scientists, Tribal College and University professors, and Native students have embarked on projects to help community residents become part of an environmentally conscious future. Join us to learn how these insightful, expert Tribal ecoAmbassadors are developing innovative and locally relevant solutions to protect public health and the environment—from creating carbon-negative and sustainable building materials to participatory air quality monitoring to exploring the impacts mercury and other toxics have on human health. Michelle J. DePass, Assistant Administrator for the EPA's Office of International and Tribal Affairs, will deliver opening remarks. Presented in partnership with the EPA.

### SPEAKERS

Richard Pablo

David Stone

Margaret Mayer

Renee Dufault

Zara Berg

Michelle DePass
